PROFILE

Full-Stack Developer specializing in scalable web and mobile applications, AI/LLM integration, and cloud infrastructure. Experienced across MERN, Next.js, NestJS, React Native, PostgreSQL, MySQL, MongoDB, Supabase, and the LangChain ecosystem. Known for translating complex product requirements into maintainable systems with clean architecture, practical interfaces, and reliable delivery.

EXPERIENCE

Full Stack Developer
Rlogical Techsoft Pvt. Ltd.

Aug 2025 — Present
Ahmedabad, India

- Build and evolve scalable web and mobile applications using MERN, NestJS, and React Native across product and platform workflows.
- Design and integrate services across Supabase, Deno, MySQL, PostgreSQL, and MongoDB while keeping data flows maintainable and observable.
- Implement AI and LLM-powered features and contribute to performance improvements, CI/CD workflows, and production reliability.

Software Engineer (Freelance)
CoolRIOTS

Oct 2025 — Jul 2026
Singapore · Remote

- Developed AI-driven site-generation workflows and complex interface interactions for an agentic business automation product.
- Worked across TypeScript, MERN, Next.js, Azure, Kubernetes, Docker, Twilio, and IBM Voice to connect intelligent workflows with usable product experiences.
- Partnered remotely across product requirements, implementation, and delivery with a focus on practical engineering decisions.

Full Stack Developer
AimBrill Technology

Oct 2023 — Jul 2025
Ahmedabad, India

- Developed scalable web and mobile applications with MERN, NestJS, React Native, MySQL, PostgreSQL, and MongoDB.
- Built and customized Shopify storefronts with Liquid and Hydrogen, integrating Shopify APIs and responsive commerce workflows.
- Contributed to maintainable codebases and CI/CD improvements across frontend, backend, and deployment workflows.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, PHP
- **Frontend:** React.js, Next.js, React Native, Redux, Tailwind CSS, Three.js, Material UI
- **Backend:** Node.js, Express.js, NestJS, Deno, REST APIs, GraphQL, Socket.IO, Prisma
- **Data & AI:** PostgreSQL, MySQL, MongoDB, Redis, Supabase, LangChain, LangGraph, RAG, Agentic AI, vector databases
- **Cloud & Delivery:** AWS, Azure, Docker, Kubernetes, Firebase, GitHub Actions, Vercel, Nginx, Cloudflare
- **Tools & Commerce:** Git, GitHub, GitLab, Jira, ClickUp, Notion, Jest, Storybook, Shopify Liquid, Hydrogen
- **Languages:** English, Hindi, Gujarati

EDUCATION

Doctor Babasaheb Ambedkar Open University
Bachelor of Science — Information Technology

Ahmedabad, India
Aug 2023 — Aug 2025

Gujarat Technological University (GTU)
Diploma — Information Technology

Gujarat, India
Oct 2020 — Jul 2023

SELECTED PROJECTS

Whereness

- Immersive virtual experience builder for creating 360° and 2D digital spaces.
- Built backend services and interactive experiences with TypeScript, React, Next.js, NestJS, PostgreSQL, Three.js, and AWS.

CoolRIOTS.AI

- AI-powered site-generation and agentic business automation platform.
- Developed AI-driven generation workflows and complex interface interactions across TypeScript, MERN, Next.js, Azure, Kubernetes, Twilio, IBM Voice, and Docker.

Ticket Jockey

- Event ticketing platform focused on event discovery, ticket purchasing, and order management.
- Built responsive customer-facing flows and backend services, and worked on primary-market availability data scraping with Chrome DevTools Protocol (CDP), Puppeteer, and Playwright to support market-aware inventory workflows.

Frontgateseats

- Ticketing and seat-purchase broker platform for browsing inventory and completing purchase workflows.
- Developed reusable APIs and React UI components with TypeScript, Supabase, PostgreSQL, and Material UI, including AI-based event ticket alerts.

Destinova AI Bot

- Context-aware AI customer support chatbot with CRM integrations and intelligent conversation workflows.
- Implemented LLM-powered features and supporting services with React.js, Node.js, PostgreSQL, Redis, and LangChain.

QYUBIC

- Cross-platform coupon and discount marketplace for users across the Gulf region.
- Developed real-time verified brand-deal experiences across Next.js, NestJS, MySQL, React Native, and Tailwind CSS.
